1 Market position

FPT Retail operates two main businesses in Vietnam: pharmacy and healthcare through Long Chau, and consumer electronics through FPT Shop. Long Chau is a major growth driver, while FPT Shop remains sensitive to consumer demand and price competition.

The changing business mix has coincided with improving margins. Gross margin rose from 16.21% in 2023 to 19.60% in 2025. Expansion also requires inventory and funding, so earnings recovery must be assessed alongside cash generation.

Why FRT needed to change

A new growth engine emerged before consolidated earnings recovered.

01 FRT needed a new growth engine

THE STORYLINE

2012-2018: building a scalable electronics-retail chain.
2017: groundwork for Long Chau was already underway.
2019-2020: the difficult "iced-tea stock" chapter in the supplied narrative.

The chronology matters: the pharmacy initiative began before the difficult share-price period.
