01 Business position and model

FRT combines consumer-electronics retail through **FPT Shop** with pharmacy and healthcare activities through **Long Chau**. The investment story rests on a changing business mix, alongside the capital required to support expansion.

LONG CHAU

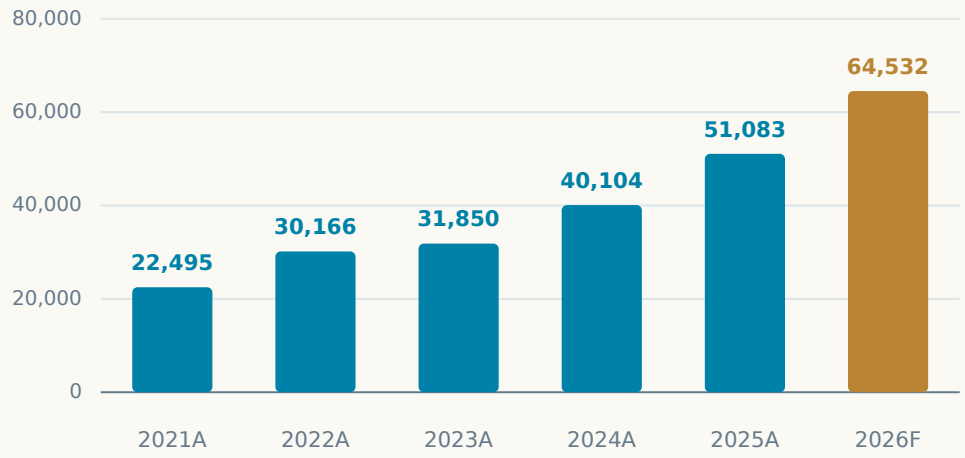

Pharmacy demand, store development and healthcare services support the growth narrative.

FPT SHOP

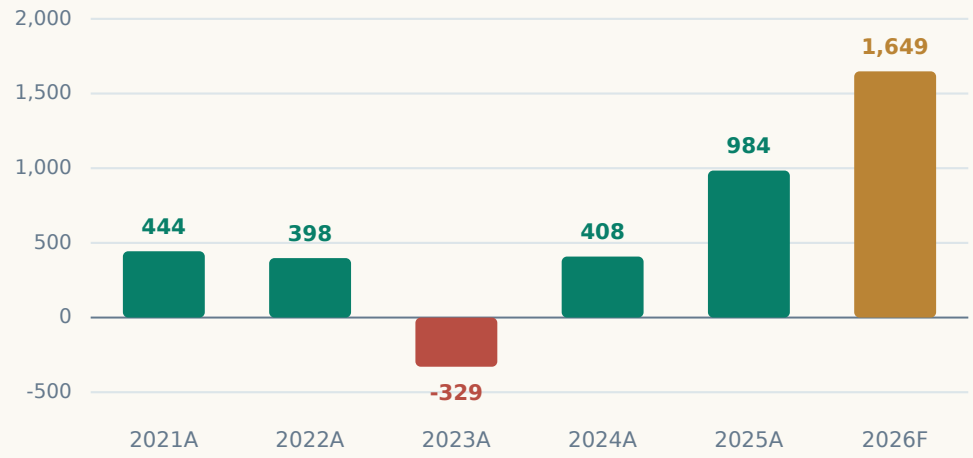

Consumer demand, price competition and operating discipline shape the recovery outlook.

02 Financial performance: recovery after 2023

NET REVENUE / VND bn

CONSOLIDATED NET PROFIT / VND bn

The model shows consolidated profit recovering from **VND -329.20bn in 2023** to **VND 984.24bn in 2025**. The 2026 forecast of **VND 1,648.50bn** remains an estimate, not a completed result.

03 Outlook, risk and monitoring horizon

Growth: healthcare expansion and FPT Shop recovery. **Watch:** margins, inventory needs, funding and cash conversion. A stronger earnings outlook must be assessed alongside cash-flow pressure.

MEDIUM- TO LONG-TERM MONITORING
Track operating execution and funding needs. Risk depends on entry valuation and investor circumstances.

Why FRT needed to change

A new growth engine emerged before consolidated earnings recovered.

01 FRT needed a new growth engine

THE STORYLINE

2012-2018: building a scalable electronics-retail chain.
2017: groundwork for Long Chau was already underway.
2019-2020: the difficult "iced-tea stock" chapter in the supplied narrative.

The chronology matters: the pharmacy initiative began before the difficult share-price period.

REVENUE GROWTH / 2022

2022 versus 2021

CONSOLIDATED NET MARGIN
1.97% → 1.32%
2021 → 2022

Financial reading: sales grew, but FRT retained less consolidated profit per VND 100 of revenue.

02 Long Chau grew. FRT still faced pressure.

Recovery has a funding cost

Improved margins support earnings. Cash conversion remains a separate test.

03 Long Chau became the core

Long Chau share: ~50% (2023) / ~68% (2025)*

Operating efficiency	2022A	2025A
Inventory turnover	**4.46x**	**3.71x**
Asset turnover	**2.83x**	**2.58x**

2025A CONSOLIDATED NET PROFIT

VND 984.24bn

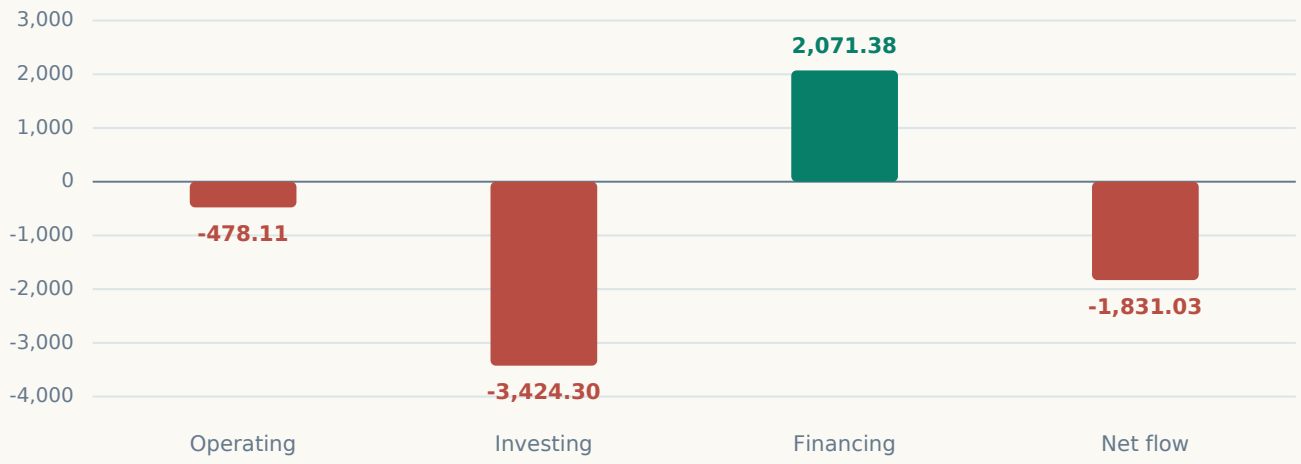

2025A: ROA 4.02% / ROE 21.90% / liabilities-to-assets 78.33%. Margins improved, while turnover remained below 2022.

04 The healthcare ecosystem needs funding

The "Amazon of healthcare" ambition describes a direction of travel. It is not evidence that the full ecosystem has already been delivered.

2026F: revenue VND 64,532.47bn / PBT VND 2,052.34bn

2026F CASH FLOW / VND bn

Model market ratios	2025A	2026F
EPS / VND per share	**4,667**	**7,160**
P/E	**30.51x**	**18.17x**
P/B	**4.72x**	**3.43x**

2026F: current ratio 1.24x / quick ratio 0.55x / liabilities-to-assets 75.16%.
Cash-flow test: growth still draws on cash and financing.
